

# **UPDATE: PUBLIC NOTICE**

The FDA, in collaboration with the Ayawaso West Municipal Assembly, has suspended all activities of the Abelemkpe branch of Marwarko restaurant in addition to the East Legon branch as part of the ongoing investigations on the suspected food poisoning incidence. The La branch of Marwarko has also been closed.

As part of its investigations, the Authority has also visited Yeboah and Del hospitals, both in East Legon, for more information on the reported cases of the suspected food poisoning. The Authority's Centre for Laboratory Services and Research has taken relevant samples for further analysis to establish the cause of the food poisoning.

As stated in our earlier notice, all necessary actions are being taken including revisiting all branches of the Marwarko restaurants to establish the extent of the incidence in order for corrective actions to be initiated to prevent any further harm to the public.
