

Commencement Of Vaccine Lot Release by FDA Ghana – Effective 1st June 2025

Dear Esteemed Stakeholders,

The Food and Drugs Authority (FDA) Ghana wishes to inform all stakeholders that the Vaccine Lot Release program will officially commence on 1st June 2025. This initiative aligns with our commitment to ensuring the safety, quality and efficacy of vaccines in Ghana.

As part of the phased implementation, the lot release process will begin with vaccines intended for the Expanded Programme on Immunization (EPI). Stakeholders are kindly requested to take note of this development and ensure full compliance with lot release requirements.

Further details on submission procedures, timelines and necessary documentation are available on the FDA website.

We appreciate your cooperation in this critical public health initiative.
